Professor & Director : Michael Koutsilieris, MD (Athens), Ph.D (McGill, Montreal)

**POSTDOCTORAL POSITION AT THE DEPARTMENT OF PHYSIOLOGY
MEDICAL SCHOOL - NATIONAL AND KAPODISTRIAN UNIVERSITY OF ATHENS**

A funded postdoctoral position is immediately available at the Department of Physiology of Medical School, National and Kapodistrian University of Athens, Greece.

The project aims to identify mechanisms regulating the homeostasis of metabolic organs, with special focus on alterations taking place in the immune microenvironment of the adipose tissue and the liver under conditions such as ageing, obesity and other interventions. In vitro approaches as well as analysis of mouse models coupled with flow cytometry and techniques of cell and molecular biology and biochemistry will be utilized. Previous work on rodent disease models is desirable, while experience in the fields of metabolism and/or immunology would be an asset.

Highly motivated candidates should apply directly via email to Dr. A. Chatzigeorgiou (achatzig@med.uoa.gr) and provide a one page cover letter and a detailed CV no later than March 31st, 2020. For more information, candidates may call +30-210-7462623.
